

# LINE: CELL PRODUCTION STATION: ELECTRODE PRODUCTION, CELL ASSEMBLY & FINALIZATION

## CONTENT

- + The combined electrode production, cell assembly and cell finalization station offers a comprehensive insight into the individual production processes of a battery
- + The current challenges in battery production will be explained and current solutions and developments from the German research landscape and the mechanical and plant engineering sector will be discussed

## FORMAT

- + Bookable as a live online or on-site seminar with trainer and group of participants
- + Time-bound and, depending on the selected format, location-bound or flexible
